*JAMA Psychiatry* aims to publish the best clinically relevant science in psychiatry. It is the psychiatry journal most frequently cited in scientific literature, and often is cited in the lay press as well. Many of its peer-reviewed original articles deal with the biological origin of mental disorders and pharmaceutical therapy.

The journal is well known for its publication of long-term, multicenter studies. Additional emphasis is given to articles of the highest quality in the diagnosis and treatment of illnesses often seen in clinical settings: anxiety, depression, and substance abuse.

The *JAMA* Specialty Network allows advertisers to target specialty audiences with more flexibility and value than ever before. For details, refer to information on page 5.
