Letters

CORRECTION

Incorrect Percentage: In the Rational Clinical Examination entitled “Will This Patient Be Difficult to Intubate? The Rational Clinical Examination Systematic Review” published in the February 5, 2019, issue of JAMA, an incorrect percentage was reported. In the “Scenario Resolution, Case 2” section, second sentence, the first percentage should have been 20% so that the sentence reads: “Based on the cursory physical examination (obese; positive LR, 2.2) and retrognathia (positive LR, 6.0), it was estimated that her posttest probability of a difficult intubation was between 20% and 40%.” This article was corrected online.

Two Rows Transposed in Table 1: In the Original Investigation entitled “Effect of Folic Acid and Zinc Supplementation in Men on Semen Quality and Live Birth Among Couples Undergoing Infertility Treatment: A Randomized Clinical Trial” published in the January 7, 2020, issue of JAMA, the data for 2 rows were transposed in Table 1. Under the row labeled “Taking multivitamin within past 3 mo,” the data for “Yes” are 298/751 (40) for the folic acid and zinc group and 284/752 (38) for the placebo group. In the next row, the data for “No” are 453/751 (60) for the folic acid and zinc group and 468/752 (62) for the placebo group. This article was corrected online.

Errors in Author Affiliations: In the Original Investigation entitled “Comparison of Abbreviated Breast MRI vs Digital Breast Tomosynthesis for Breast Cancer Detection Among Women With Dense Breasts Undergoing Screening” published in the February 25, 2020, issue of JAMA, the Department of Radiology, University of Rochester, Rochester, New York, affiliation that was given for Gillian M. News- toed, MD, should have instead been given for Jennifer A. Harvey, MD. This article was corrected online.

Guidelines for Letters

Letters discussing a recent JAMA article should be submitted within 4 weeks of the article’s publication in print. Letters received after 4 weeks will rarely be considered. Letters should not exceed 400 words of text and 5 references and may have no more than 3 authors. Letters reporting original research should not exceed 600 words of text and 6 references and may have no more than 7 authors. They may include up to 2 tables or figures but online supplementary material is not allowed. All letters should include a word count. Letters must not duplicate other material published or submitted for publication. Letters not meeting these specifications are generally not considered. Letters being considered for publication ordinarily will be sent to the authors of the JAMA article, who will be given the opportunity to reply. Letters will be published at the discretion of the editors and are subject to abridgement and editing. Further instructions can be found at http://jamanetwork.com/journals/jama/pages/instructions-for-authors. A signed statement for authorship criteria and responsibility, financial disclosure, copyright transfer, and acknowledgment are required before publication. Letters should be submitted via the JAMA online submission and review system at https://manuscripts.jama.com. For technical assistance, please contact jama-letters@jamanetwork.org.
