gastroenterologists experienced with IBD and familiar with the safety profiles of the medications.

Kelly Cushing, MD, MSCI
Peter D. R. Higgins, MD, PhD, MSc

Author Affiliations: Division of Gastroenterology, University of Michigan, Ann Arbor.

Corresponding Author: Peter D. R. Higgins MD, PhD, MSc, SPC 5682, 1150 W Medical Center Dr, University of Michigan, Ann Arbor, MI 48109 (phiggins@med.umich.edu).

Conflict of Interest Disclosures: Dr Higgins reported receiving grants from AbbVie, Janssen, Eli Lilly, PRIME Medical Education, the National Institutes of Health, Pfizer, and the Rainin Foundation. No other disclosures were reported.

CORRECTION

Incorrect P Value and Figure Label Error: In the Original Investigation titled “Effect of Mechanical Thrombectomy Without vs With Intravenous Thrombolysis on Functional Outcome Among Patients With Acute Ischemic Stroke: The SKIP Randomized Clinical Trial,” published in the January 19, 2021, issue of JAMA, the P value for the modified Rankin Scale score reduction (shift analysis) should have been reported as 0.37 in the Results section and Table 2. Also, the labels in the forest plot in Figure 3 should have been switched, so that “Favors intravenous thrombolysis plus mechanical thrombectomy” was on the left and “Favors mechanical thrombectomy alone” was on the right. This article was corrected online.

Guidelines for Letters

Letters discussing a recent JAMA article should be submitted within 4 weeks of the article’s publication in print. Letters received after 4 weeks will rarely be considered. Letters should not exceed 400 words of text and 5 references and may have no more than 3 authors. Letters reporting original research should not exceed 600 words of text and 6 references and may have no more than 7 authors. They may include up to 2 tables or figures but online supplementary material is not allowed. All letters should include a word count. Letters must not duplicate other material published or submitted for publication. Letters not meeting these specifications are generally not considered. Letters being considered for publication ordinarily will be sent to the authors of the JAMA article, who will be given the opportunity to reply. Letters will be published at the discretion of the editors and are subject to abridgement and editing. Further instructions can be found at http://jamanetwork.com/journals/jama/pages/instructions-for-authors. A signed statement for authorship criteria and responsibility, financial disclosure, copyright transfer, and acknowledgment are required before publication. Letters should be submitted via the JAMA online submission and review system at https://manuscripts.jama.com. For technical assistance, please contact jama-letters@jamanetwork.org.
