CORRECTION

Errors in Abstract and Supplement: In the Brief Report titled “Effect of Brief Counseling by Allied Health Professionals on Step Count of People With Peripheral Artery Disease: A Randomized Clinical Trial,”1 published online February 8, 2023, and in the April 2023 issue, there were errors in the Abstract and Supplement. In the Results section of the Abstract, the last sentence was updated to, “The counseling intervention did not affect the rate of major adverse limb events over 24 months (12 [11.8%] in the intervention group vs 14 [14.3%] in the control group; P = .68).” In Supplement 1, values in eFigure 3 and eTable 3 were updated. This article was corrected online.2
