knowledge derived from well-designed clinical trials and studies of cost-effectiveness are especially important for improving the practice of medicine. Studies that increase the understanding of the effects of treatment or the means by which the burden of dermatologic disease can be reduced and promoted to the health care system will receive special priority. The journal regularly publishes reports on clinical investigations, editorials, and reviews. It also features reports and discussions on dermatologic computations, clinical disorders of unique diagnostic value, pharmacology, medical and surgical therapeutics, and ethical, moral, socioeconomic, and political issues.

Associate Publisher/Senior Product Development Geoffrey Flick
Managers Lindsay Dawson, Ellen Gibson, Craig McCaffrey, Michael McGraw, Daniel Pickhardt, Rondondo Susanna, Subramaniam, Stacey Tucker, WC Walsh
Business Analyst Sinhara Allari
