.skin disorders. This journal has a particular interest in publishing clinical and laboratory studies that reveal
knowledge derived from well-designed clinical trials and studies of cost-effectiveness are especially
important for improving the practice of dermatology. Studies that increase the understanding of the
outcome of treatment or the means by which the burden of dermatologic disease can be measured and
reduced to promote the health of patients will receive special priority. The journal regularly publishes
reports on clinical investigations, editorials, and reviews. It also features reports and discussions on
clinical trials and studies of cost-effectiveness.
