

**Correction**

Error in Figure. In the Study by Juarez et al titled “Analysis of T-Cell Receptor Gene Rearrangement for Predicting Clinical Outcome in Patients With Cutaneous T-Cell Lymphoma: A Comparison of Southern Blot and Polymerase Chain Reaction Methods,” published in the September issue of the ARCHIVES (2005;141:1107-1113), an error occurred in the Figure on page 1110. In the Figure, 2 line markers in the figure key were reversed. The line markers should have indicated that the poorest survival was in the patients with T3/T4 disease, not the patients with T2 disease. The corrected Figure is reproduced here.
