Correction

Error in Table Notes

In the Original Investigation titled "Association Between Adolescent Blunt Use and the Uptake of Cigars," published December 6, 2019, there was an error in footnote a of Table 4 and Table 5. Footnote a for both tables should have read "Cigar use was categorized as 0 for never used and 1 for ever used..." instead of "Blunt use was categorized as 0 for never and 1 for ever used..." This article has been corrected.¹
