Correction

Errors in Abstract, Table, and Discussion

In the Original Investigation titled "Effect of Bimagrumab vs Placebo on Body Fat Mass Among Adults With Type 2 Diabetes and Obesity: A Phase 2 Randomized Clinical Trial,"1 published January 13, 2021, there were errors in the Abstract, Table, and Discussion. In the Abstract, the change in hemoglobin A1c in the placebo group should have been 0.04 percentage points. In Table 2, the P value for the Matsuda index should have been .10. The first paragraph of the Discussion should have referred to a 0.5% decrease in body fat mass and a 0.04–percentage increase in hemoglobin A1c in the group that received placebo and lifestyle intervention. This article has been corrected.1
