Correction

Error in Abstract Conclusions and Relevance

In the Original Investigation titled “Assessment of Incidence and Factors Associated With Severe Maternal Morbidity After Delivery Discharge Among Women in the US,”1 published February 2, 2021, there was an error in the Abstract Conclusions and Relevance section. The phrase “14.1% of SMM cases in the Medicaid cohort and 15.7% of SMM cases in the commercial insurance cohort” reversed the percentage values. The phrase should have read “15.7% of SMM cases in the Medicaid cohort and 14.1% of SMM cases in the commercial insurance cohort.” This article has been corrected.1
