Errors in Tables 1 and 2

In the Original Investigation titled “Association of Social and Economic Inequality With Coronavirus Disease 2019 Incidence and Mortality Across US Counties,”1 published January 20, 2021, there was an inconsistency in the presentation of data between Tables 1 and 2. The data in Table 2 regarding population aged younger than 20 years, population aged 70 years or older, and population density should have been calculated using the same measurement units as in Table 1. Table 1 has also been amended to fix incorrect values that were given for population density. This article has been corrected.
