In the Original Investigation titled "Communication of Intent to Do Harm Preceding Mass Public Shootings in the United States, 1966 to 2019," published November 4, 2021, there were errors in Table 3. The odds ratios that appear in model 3 for psychiatric medication, social media use, planning, performance, interest in past mass violence, and fame-seeking motive should have read NA, 1.7 (0.4-7.6), 3.1 (0.9-11.0), 1.3 (0.2-8.3), 2.0 (0.5-7.6), and 0.3 (0.0-2.4), respectively. The P values should have read NA, .46, .08, .77, .29, and .25, respectively. This article has been corrected.
