Correction

Data Errors in Table 3

The Original Investigation, “Effect of Brief Produce Exposure and Unconstrained Grocery Gift Cards on Caregiver Influence on Diet of Elementary Age Children: A Randomized Clinical Trial,” published in JAMA Network Open, had errors in 1 row of data in Table 3. The mean (SE) intake of fruits and vegetables for caregivers in the control group should have been 4.79 (0.46) times/d at baseline, 4.45 (0.45) times/d at 4 weeks, and 5.19 (0.49) times/d at 8 weeks. These numbers have been corrected.1
