Correction

Error in Figure 2

In the Original Investigation titled "Association of Intravenous Potassium and Magnesium Administration With Spontaneous Conversion of Atrial Fibrillation and Atrial Flutter in the Emergency Department,"1 published October 19, 2022, there was an error in Figure 2. The bold dashed line that appeared slightly to the right of the 2 value on the x-axis should have appeared in the position indicating "1.98." This article has been corrected.1
