Correction

Errors in Figure

In the Research Letter titled "Association of Wildfire Air Pollution With Clinic Visits for Psoriasis," published January 13, 2023, the data plotted for lag 3 and lag 4 in panel B of the Figure showed a lower end of the 95% CI above 1 for both lag 3 and lag 4. However, the data plotted for the lower end of the 95% CI for each of these 2 lags should have been below 1. This article has been corrected.
