CORRECTION

Error in Tables: The Original Investigation titled “Factors Associated With Visual Acuity and Central Subfield Thickness Changes When Treating Diabetic Macular Edema With Anti–Vascular Endothelial Growth Factor Therapy: An Exploratory Analysis of the Protocol T Randomized Clinical Trial,” published in January 2019, was corrected to fix errors in Tables 1 and 2. The entry for the reference category should indicate “Reference” rather than “1 [Reference]” for model estimate differences in both Tables. This article was corrected online.
