CORRECTION

Errors in Table 2 and Table 3: In the Original Investigation titled “Association Between Communicative Participation and Psychosocial Factors in Patients With Voice Disorders,”1 published online December 23, 2020, there were negative symbol errors in Table 2. The third row in the VHI-10 column should have expressed negative values. The negative values in the fourth through seventh rows should have been positive. In the Vocal impairment (VHI-10) row, the fourth column should have expressed negative values. The negative values in the fifth through eighth columns of the third row should have been positive. In Table 3, there should have been a negative symbol for the t-value for Communicative Participation (third row). This article was corrected online.
