Psychiatric morbidity in children with febrile seizures is not restricted to those with possible underlying brain abnormalities or adverse perinatal conditions.

Julie Werenberg Dreier, PhD
Yuelian Sun, PhD
Jakob Christensen, MD, DrMedSci

Author Affiliations: National Centre for Register-Based Research, Department of Economics and Business Economics, Aarhus University, Aarhus, Denmark (Dreier, Sun, Christensen); Centre for Integrated Register-Based Research, Aarhus University, Aarhus, Denmark (Dreier); Department of Neurology, Aarhus University Hospital, Aarhus, Denmark (Sun, Christensen).

Corresponding Author: Julie Werenberg Dreier, PhD, National Centre for Register-Based Research, Aarhus University, Fuglesangs Allé 26, 8210 Aarhus V, Denmark (jwdreier@econ.au.dk).

Conflict of Interest Disclosures: Dr Christensen has received honoraria for serving on the Scientific Advisory Board of Union Chimique Belge (UCB) Nordic and Eisai AB. Dr Christensen has also received honoraria for giving lectures for UCB Nordic and Eisai and received travel funds from UCB Nordic. No other disclosures were reported.

CORRECTION

Errors in Figure, Byline, and Author Affiliations: The Research Letter titled “Patterns of Mean Age at Drug Use Initiation Among Adolescents and Emerging Adults, 2004-2017,” published online March 2, 2020, contained errors in the byline, affiliations, and Figure. The second degree of second author Christopher L. Thompson, MD, MHI, was omitted and has been added. The affiliation of Kari C. Alcover, PhD, was reported as Elson Floyd College of Human Medicine (Department of Medical Education and Clinical Sciences, Washington State University, Spokane) and has been corrected to Elson S. Floyd College of Medicine. The affiliation of Dr Thompson was reported as Peds AI Clinic and has been corrected to Peds AI. Finally, 2 graphs in the Figure were lacking the footnote citation b, which denotes a level of significance; this has been added to the graphs for cigar and cocaine.

Error in Byline: In the Original Investigation titled “Cycled Phototherapy Dose-Finding Study for Extremely Low-Birth-Weight Infants: A Randomized Clinical Trial,” published online April 27, 2020, there was an error in the author byline. The fourth author’s middle initial should be “A,” not “F,” so his name reads “Wally A. Carlo.” This article was corrected online.
