CORRECTION

Errors in Figures: In the Original Investigation titled "Clinical Recovery and Long-Term Association of Specialized Early Intervention Services vs Treatment as Usual Among Individuals With First-Episode Schizophrenia Spectrum Disorder: 20-Year Follow-up of the OPUS Trial," published on February 22, 2023, there were errors in Figures 1 and 3. In Figure 1, the numbers of participants allocated to treatment as usual, undergoing treatment as usual at 1-year follow-up, and allocated to the intensive early intervention program are 272, 192, and 275, respectively. In Figure 3, all-cause mortality rate at 20-year follow-up has been added. This article has been corrected online.
